

Digital Media Arts Certificate

The Digital Media Arts Certificate prepares students to enter the digital media industry with solid technical, conceptual, and aesthetic foundations as capable and fluent creators of visual, time-based digital content for existing and emerging media. Students will learn to direct, shoot, edit and produce video; produce original animated 2D and 3D graphic elements; and enhance the visual communication of ideas and information for traditional screen-based delivery and emerging web and mobile delivery.

Anyone may enroll in this certificate, and it is especially valuable to those in the fields of graphic design, information technology, web design, mass communication, still photography, or journalism.
