

IT-Cisco CCNA Certificate

This certificate is intended for people already working in the information technology field who want to update their skills and knowledge relating to current Cisco hardware and software. Upon completion of this certificate the student will meet the basic competencies and be prepared to take the Cisco Systems exam to meet the requirements for the Cisco Certified Network Associate (CCNA) certificate.

Courses in this certificate require the use of a PC configured with the Microsoft Windows XP Professional operating system. If the student does not have access to this configuration, the coursework can be completed at the college campus in the IT computer labs.
