

IT-Website Development and Support Certificate

With this certificate the student will learn to manage and maintain websites and assist website users with their needs. Upon completion of this certificate the student will meet the basics competencies and be prepared to take the following CompTIA exam to meet the requirements for the Project+ industry certificate. Courses in this certificate require the use of a PC configured with the Microsoft Windows XP Professional operating system, Microsoft Project 2003, and JAVA 2 with SDK 5. If the student does not have access to this configuration, the coursework can be completed at the college campus in the IT computer labs.
