

## INDUSTRIAL ELECTRONICS TECHNICIAN

Technical Diploma

### About the Industrial Electronics Technician Program

Industrial electronics technicians work closely with engineers and electromechanical technicians to perform basic installation, maintenance, and repair activities for industrial electronic and mechanical equipment. This technical diploma will teach students industrial safety practices to include lockout/tag out, isolate faults, test fuses, wire motors, understand, and apply electrical principles to solve failures in the field. Students integrate these concepts with hydraulic, pneumatic, and mechanical systems. An introduction of programmable logic controllers help students develop entry-level skills in manufacturing.

### PROGRAM OUTLINE

TERM: 1		
Course #	Course Title	Credits
1010311500	MS Word Beginning Provides practice in using basic word processing functions and features of MS Word.	1.00
1010312600	MS Excel Beginning Develops skills in using basic spreadsheet functions of MS Excel for business users.	1.00
1044910000	Industrial Safety Fundamentals Introduces general safety for a manufacturing environment while raising the awareness of the worker to the hazards around them, and how to best protect themselves while working safely. Students will earn an OSHA 30 card and confined space certificate upon completion.	2.00
1046211500	Basic Electrical Circuits Students will learn how to measure voltage, current and resistance in an electrical circuit.	1.00
1046211700	Inductance and Capacitance Students will learn how to define and calculate inductance and capacitance in an electrical circuit.	1.00
1046211900	Analyze Transformers Students will learn how to size a transformer and how to identify the step up and step down transformers.	1.00
1062010200	Hydraulic and Pneumatic Operation Students will learn basic hydraulic and pneumatic fundamentals with associated symbology.	1.00
1062010600	Ladder Logic Elements and Control Logic Students will learn the basics of sequencing and devices used in hydraulics and pneumatics machines.	1.00
1062010900	Analyze Directional Control Valves Students will utilize the DCV's to control sequencing , timing and pressure control in hydraulic and pneumatic systems.	1.00
1062011200	PLC Fundamentals and Basic Instructions Student will learn the components of the plc and beginning level programming.	1.00

Course #	Course Title	Credits
1080119500	Written Communication Develops writing skills which include prewriting, drafting, revising, and editing. A variety of writing assignments is designed to help the learner analyze audience and purpose, research and organize ideas, and format and design documents based on subject matter and content. Also develops critical reading and thinking skills through the analysis of a variety of written documents.	3.00
<b>TERM: 2</b>		
Course #	Course Title	Credits
1046212100	Mechanical Drive Systems Students will learn how to install a drive and properly align a shaft.	1.00
1046212400	Belt and Chain Drives Students will learn how to properly install and adjust drive components.	1.00
1062011600	Analyze the Use of Oscilloscopes Students will learn the use of the oscilloscope to test electronic circuits beginning with common power supply systems.	1.00
1062011800	Analyze Sensing Devices and Op Amps Students will learn the operation and troubleshooting of inductive, capacitive, optical and hall effect sensors.	1.00
1062012000	Analyze SSRs and Switching Circuits Students will learn about and troubleshoot solid state relays and switching circuits commonly used.	1.00
1062012300	Three Phase Electric Motor Control Students will learn about safety, 3 phase power transformation and manual control of three phase motor control systems.	1.00
1062012500	Investigate Troubleshooting Methods Students will learn about the types and methods of troubleshooting for 3 phase motor control systems.	1.00
1062012700	Troubleshooting Common Motor Circuits Students will examine the function and troubleshooting of reversing, automatic and timer controlled industrial motor control systems.	1.00
1062012900	PLC Timers Counters and Program Controls Students will learn the operation and the use of timer, counter, MCR and first scan program instructions	1.00
1062013300	PLC Sequencing and Data Function Blocks Students will learn the operation of event sequencing, addition, subtraction, multiplication and division function blocks.	1.00
1080413400	Mathematical Reasoning An activity based approach is used to explore numerical relationships, graphs, proportional relationships, algebraic reasoning, and problem solving using linear, exponential and other mathematical models. Students will develop conceptual and procedural tools that support the use of key mathematical concepts in a variety of contexts. This course is not designed for Science, Technology, Engineering, or Math (STEM) students and/or others who require calculus. Prerequisite: 7785478000 Principles of College Math (C or better) or Accuplacer Algebra score $\geq 35$ or UW Math Placement Basic Math Skills score $\geq 250$ or ACT Mathematics score $\geq 18$ or Tailwind Math College Math Fund score $\geq 16$ .	3.00

Course #	Course Title	Credits
1080919900	Psychology of Human Relations Focuses on improving personal and job-related relationships through understanding and applying sound psychological principles. Topics include self-concept, motivation, emotions, stress management, conflict resolution, and human relation processes.	3.00

**Total Credits: 30.00**

Talk with an Academic Advisor about the program outline. Together, you will determine if credits you've already earned satisfy any requirements, discuss possible alternative courses, and choose the best classes if you're thinking of transferring.

## AT A GLANCE

### How You'll Learn

ON CAMPUS ONLINE CLASSES MULTIPLE START DATES PERSONALIZED PACE

### 2021 Start Dates

January 6	May 7	September 1
February 1	June 7	October 4
March 1	July 5	November 1

### 2022 Start Dates

January 5	March 1	June 6
February 7	May 2	July 11

**\$4,795\***

Financial Aid Eligible

\*Based on 20-level courses—materials, books, and fees may be additional

### What You'll Learn

- Practice industry recognized safety practices and guidelines, including the use of personal protective equipment in an industrial operating environment.
- Work as part of a maintenance team to assemble/disassemble, troubleshoot, diagnose and repair industrial equipment and

systems using appropriate tools, materials, and methods.

- Interpret drawings, schematics, and specifications for industrial equipment.
- Document technical information through descriptive writing, sketches/diagrams, mathematical expression, computation, and graphs.
- Use precision measuring equipment.
- Apply knowledge of electricity, electronics, hydraulics, and electric motors and mechanics.
- Perform electrical, mechanical, and fluid measurements by properly selecting tools and test equipment.
- Apply electrical skills to troubleshoot control and operator panels.

---

## Your Potential Careers

- Electrical or Electronic Maint
- Field Service Technician

---

## Median Annual Salary

\$48,622	\$42,864	\$45,469
Local	State	National

EMSI 2020.1
