PHLEBOTOMY
Technical Certificate

About the Phlebotomy Technician Program

Phlebotomy Technician prepares individuals, under the supervision of physicians and other health care professionals, to draw blood samples from patients using a variety of intrusive procedures. Includes instruction in basic vascular anatomy and physiology, blood physiology, skin puncture techniques, venipuncture, venous specimen collection and handling, safety and sanitation procedures, and applicable standards and regulations. This program provides an occupational pathway to Medical Assistant technical diploma (12 credits transfer).
